## DETAILED ACTION

### *Election/Restrictions*

1. The reply filed on February 17, 2003 identifies "polyols as set forth in claim 4". Although this statement DOES NOT ELECT A SINGLE!!! DISCLOSED SPECIES as was requested in the election of species requirement, Examiner did send another "non-responsive" communication in order to not further delay the prosecution. However, Applicants are reminded that under 35 U.S.C. § 121 to elect a **single ultimate disclosed specie for each of the above (polyols) genera** for prosecution on the merits to which claims shall be restricted if no generic claim is finally held allowable. Where specific species are not identified in the claims, **Applicant should have elected a specific specie from the Specification. An alternative method of election is to identify an Example which collectively exemplifies the elected species.**

2. New claims 12-20 if presented in the first place would have been restrictable as follows:

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-6, 12-13, 15-20, drawn to liquid composition or a (co)polymer

Art Unit: 1713

Group II, claim(s) 7, -10, 18, drawn to a method of making a polymer under specific conditions would have been attributed to another group

4. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the composition as claimed in Group I does not require the specificities of the process of Group II, and the process of Group II does not specifically produce the composition of Group I, and, furthermore, can be utilized for producing any other materially different composition, and therefore, specific technical feature linking both inventions does not exist.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicants are further advised to contact the undersigned, if any questions arise, and to finally make a proper election in order to accelerate prosecution of Application.

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1713

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
